4. Maintain 2m social distancing, where possible
5. Where people cannot be 2m apart, manage transmission risk

You should display your Staying COVID-19 Secure poster to show you have followed Government guidance and share the results of your risk assessment with your workforce.

HAND SANITISERS

Perfect for the workplace, hand sanitiser works quickly to deactivate microorganisms and reduce bacterial counts on the hands when soap and water might not be accessible. Hand sanitisers that make viruses inactive, in particular hand sanitisers that make coronavirus inactive, are currently in high demand.

But with so many hand sanitisers suddenly appearing on the market, it's important to choose a reputable one.
